HUSSEIN HAZIME

hazimehussein01@gmail.com • +961 78905718 • LinkedIn • GitHub • Lebanon

SUMMARY

Full-Stack Software Engineer with **3.5+ years of professional experience** building scalable, production-grade web and mobile applications across e-commerce, AI-powered platforms, licensing systems, and real-time environments. Strong expertise in the modern **JavaScript/TypeScript ecosystem**, including **Next.js, React, Node.js (NestJS), Firebase, MongoDB, and Supabase**, complemented by cross-platform development using **React Native, Expo, and Flutter**.

Experienced in architecting secure backend systems, designing RESTful APIs, implementing **real-time communication with WebSockets**, and integrating advanced **AI services (OpenAI GPT, Google Gemini, Vertex AI)** into live applications. Proven background in payment gateway integration, multi-currency systems, refund handling, cron-based automation, and scalable cloud infrastructures.

Passionate about delivering high-quality, user-centric products with advanced UI/UX, animations, and interactive 3D experiences. Effective in both **collaborative team environments and independent project ownership**, consistently contributing to clean architecture, performance optimization, and reliable software delivery aligned with business goals.

EDUCATION

Islamic University of Lebanon (IUL), B.Sc. Computer Science — **Graduated — 2025**

EXPERIENCE

Software Engineer, BBCorp — **Nov 2025 — Present**

- Develop full-stack applications using **Next.js, React, NestJS, Firebase, MongoDB, and Flutter**
- Design and implement secure backend services and RESTful APIs
- Integrate third-party APIs and real-time data services
- Implement background jobs and scheduled tasks using cron
- Develop multi-language applications (**English & Arabic**)
- Contribute to scalable architecture, performance optimization, and clean code practices

Freelancer, Mibio.am — **May 2023 — Present**

- Built a full-featured **e-commerce platform** using **Next.js, Medusa.js, Tailwind CSS, and shadcn/ui**
- Integrated secure **Bank Payment APIs** for online transactions
- Implemented backend commerce logic using **Medusa.js**
- Used **Supabase** for database services and backend operations
- Developed secure **cron jobs** for automated order handling and system processes
- Built an internal **Admin Dashboard** using **Next.js, Firebase, and Tailwind CSS**
- Implemented authentication, order management, product management, and analytics
- Developed a cross-platform **mobile application** using **React Native & Expo**
- Implemented **multi-language support (Armenian & English)** across web, dashboard, and mobile app
- Designed responsive, scalable UI/UX optimized for performance
- Delivered production-ready deployment and cloud-based infrastructure

Frontend Intern, SmartSoft Company — **Aug 2023 — Oct 2023**

- Developed web applications with **React.js**
- Built a **React + Material UI + AgGrid** application
- Used Git for collaboration and version control

Fullstack Developer, HebboSites Company — **Aug 2023 — Oct 2023**

- Full-stack development with **MongoDB, Next.js, React, Tailwind CSS, Sanity.io**
- Built RESTful APIs and implemented authentication
- Designed responsive UI/UX systems
- Optimized database queries and improved performance
- Participated in Agile workflows and code reviews

PROJECTS

Mashabeat 2023

- Collaborated within a development team to build a **music-focused e-commerce platform** using **Shopify**
- Implemented custom features using **Liquid, jQuery, and Tailwind CSS**
- Developed a system allowing **artists to register, upload music, and monetize their content**
- Built secure **artist dashboards** and digital purchase workflows
- Integrated a custom audio-processing pipeline using **SoX** to apply watermark overlays for content protection
- Implemented a **professional audio player** optimized for seamless streaming previews
- Developed interactive features including **music reviews and likes**
- Enhanced UI/UX for smooth browsing, purchasing, and music playback experience
- Project

Mibio.bio 2024

- Developed an **NFC-powered digital business card platform** enabling users to create and manage professional business profiles
- Built the web application using **Next.js and Tailwind CSS**
- Implemented dynamic **business profile pages** with sharable public links
- Developed a secure **user dashboard** allowing profile editing and multiple profile creation
- Integrated **Firebase** as centralized backend and real-time database
- Built a cross-platform **mobile application** using **React Native & Expo** connected to the same Firebase backend
- Implemented **multi-language support**
- Ensured real-time synchronization between web and mobile platforms
- Designed a responsive, modern UI optimized for performance and usability
- Project

Mibio.am 2025

- Developed a full-scale **multi-language e-commerce platform** using **Next.js, shadcn/ui, and Tailwind CSS**
- Implemented **Armenian & English localization** across storefront, dashboard, and user flows
- Integrated secure **Bank Payment APIs** supporting payments, refunds, and order cancellations
- Built backend commerce logic and admin management using **Medusa.js**
- Implemented **multi-currency support** with automated currency updates using secure **cron jobs**
- Designed and developed a custom **admin dashboard** for product management, orders, users, and analytics
- Built and maintained a connected **React Native & Expo mobile application**
- Ensured secure transaction handling, scalable architecture, and optimized performance
- Project

Hayvors 2025

- Developed an online **hunter licensing platform** enabling users to apply, purchase, and renew hunting licenses
- Built using **Next.js, shadcn/ui, and Tailwind CSS**
- Integrated **Bank Payment APIs** with secure payment processing and refund functionality
- Implemented license purchasing options for single-year and multi-year subscriptions with renewal system
- Generated dynamic **license cards as images** for admin printing and physical distribution
- Embedded **QR codes** linking to secure public profile pages for license verification
- Built user profile pages displaying license status and personal information
- Integrated **Google APIs** for intelligent image processing and document data extraction
- Designed an admin system for managing users, licenses, approvals, and payments
- Developed a responsive, production-ready interface optimized for performance and usability
- Project

Legacy 2025

- Developed a **memorial portfolio platform** for preserving and showcasing life stories

- Built using **Next.js, Firebase, and Tailwind CSS**
- Implemented dynamic profile pages displaying biography and memories
- Developed an interactive photo gallery and secure comment system
- Created an admin dashboard for managing profiles and media uploads
- Designed a modern, responsive UI optimized for accessibility and user experience
- Project

SKILLS

Programming Languages

- JavaScript (ES6+), TypeScript, Python, Java, C/C++, Dart, PHP, C#, SQL, Liquid

Frontend & UI Engineering

- React.js, Next.js (App Router), shadcn/ui, Tailwind CSS, Material-UI, Bootstrap
- Advanced UI/UX Implementation
- Responsive & Mobile-First Design
- Component-Based Architecture & Design Systems
- Multi-language (i18n) Implementation
- Performance Optimization & SEO Best Practices
- State Management & Real-Time UI Updates

Animation & 3D Development

- Framer Motion
- GSAP
- three.js
- WebGL Concepts
- Interactive 3D Experiences
- Smooth Micro-Interactions & Advanced UI Animations
- Custom Motion Design Implementation

Backend Development

- Node.js, NestJS, Express.js
- RESTful API Design & Integration
- Authentication & Authorization (JWT, RBAC)
- WebSockets & Real-Time Communication
- Event-Driven Architecture
- Server-Side Rendering (SSR)
- Medusa.js (Headless E-commerce Backend)
- Background Jobs & Cron Automation
- Payment Processing Logic, Refund & Cancellation Systems

AI & Intelligent Systems

- OpenAI GPT API Integration
- Google Gemini API Integration
- Google Vertex AI API
- AI-Powered Image Processing & Data Extraction
- OCR & Intelligent Document Parsing
- Prompt Engineering & AI Workflow Integration
- AI Feature Integration into Web & Mobile Applications

Real-Time & Communication Systems

- WebSocket Implementation (Client & Server)
- Real-Time Data Streaming
- Live Dashboard Updates
- Firebase Real-Time Synchronization
- Notification Systems & Event Broadcasting

Mobile Development

- React Native, Expo
- Flutter (Cross-Platform Development)

- NFC Handling (Read/Write, Tag Encoding & Parsing)
- Push Notifications (Firebase Cloud Messaging)
- Real-Time Sync with Backend Services
- Shared API Architecture (Web & Mobile)

Databases & Cloud

- MongoDB, MySQL
- Firebase (Auth, Firestore, Storage, Hosting, Cloud Functions)
- Supabase
- Real-Time Data Handling
- Multi-Environment Deployment

E-Commerce & Payments

- Shopify Development
- Custom Commerce Solutions (Medusa.js)
- Bank API Integration
- Multi-Currency Systems
- Secure Payment, Refund & Order Lifecycle Handling

APIs & Integrations

- Third-Party API Integration
- Google APIs (OCR, Image Processing)
- Financial & Trading API Integrations
- QR Code Generation & Verification Systems

Media Processing

- SoX (Audio Watermarking & Processing)
- FFmpeg
- Custom Audio Player Implementation

DevOps & Tools

- Git, GitHub, Bitbucket
- Docker
- Cloudflare
- ngrok
- Uploadthing
- CI/CD Concepts

Software Engineering Practices

- Clean Architecture
- Scalable System Design
- Agile & Scrum Methodologies
- Code Reviews & Team Collaboration
- Debugging & Performance Profiling
- Production Deployment & Monitoring
